

Participant Handbook

GenAI Website Builder Hackathon

Reference this when you're stuck. Not required reading upfront.

Suggested Architecture

Deployment — Get Live by Hour 4

Platform	Best For	Free
Vercel	React frontends	✓
Netlify	Static HTML/JS output	✓
Render	FastAPI backends	✓
Railway	Full-stack + database	✓

Steps: Push to GitHub → connect repo on Vercel/Render → add `GROQ_API_KEY` as environment variable → deploy.

Reference Docs

Groq — LLM Inference

Quickstart	console.groq.com/docs/quickstart
Models	console.groq.com/docs/models
Structured Output	console.groq.com/docs/responses-api
Tool Use	console.groq.com/docs/tool-use
Vision / Multimodal	console.groq.com/docs/vision
Cookbook (code examples)	github.com/groq/groq-api-cookbook

Agno — Agent Framework

GitHub + Docs	github.com/agno-agi/agno
Groq + Agno Guide	console.groq.com/docs/agno

FastAPI — Backend

Official Docs	fastapi.tiangolo.com
First Steps	fastapi.tiangolo.com/tutorial/first-steps
Request Body	fastapi.tiangolo.com/tutorial/body

Pydantic — Output Validation

Official Docs docs.pydantic.dev

With FastAPI fastapi.tiangolo.com/tutorial/extra-models

Langfuse — Observability

Docs langfuse.com/docs

Tracing Quickstart langfuse.com/docs/observability/get-started

Deployment

Vercel + React guide vercel.com/kb/guide/deploying-react-with-vercel

FastAPI on Render render.com/docs/deploy-fastapi

Bootcamp Skills Being Tested

Week	What's Under Evaluation
Week 1	Streaming LLM calls, prompt design, Langfuse tracing
Week 2	Structured outputs with Pydantic, error handling
Week 3	RAG for design inspiration (Tier 3)
Week 4	Agentic / multi-step generation (Tier 3)
Week 5	Prompt robustness — vague and adversarial inputs

Week 6 Multimodal — sketch/screenshot to site (Tier 3)

Week 9 Knowing when prompting alone is sufficient
